## Instructions

You may not use a calculator to answer any questions in this test.

## Questions and answers

- Work as quickly and as carefully as you can.
- Put your answer in the box for each question.

- All answers should be given as a single value.
- For questions expressed as common fractions or mixed numbers, you should give your answers as common fractions or mixed numbers.
- If you cannot do a question, go on to the next one. You can come back to it later, if you have time.
- If you finish before the end, go back and check your work.

## Marks

- The number under each box at the side of the page tells you the maximum number of marks for each question.
- In this test, long division and long multiplication questions are worth TWO marks each. You will be awarded TWO marks for a correct answer.
You may get ONE mark for showing a formal method.
- All other questions are worth ONE mark each.
- If you finish before the end, go back and check your work.

The instructions and principles of this mark scheme closely follow the guidance in the 2016 national curriculum tests. We have deliberately not set a limited time for the test paper as a teacher may want to vary it according to the standard individual children are working at.

The national curriculum test allows 30 minutes to complete this test.

## "Third Space has done wonders for

 pupils' attitudes towards maths - they look forward to their sessions. Also the fact I can pick and choose qualify sessions is a huge asset.Lisa Graham, Deputy Head, St Hughes C-of-E Primary

# "My tutor understands when I don't get things right. She helps me through at a steady pace and always believes I can do it: ${ }^{\prime \prime}$
